

A black and white portrait of Mert Sezer, a man with a beard and short hair, wearing a dark button-down shirt. He is looking slightly to the right of the camera with a neutral expression.

Mert Sezer

CES Innovation Awards 2026 Judge

International Recognition and Sector-Level Leadership in Digital Technology

I was selected as an Official Jury Member for the CES Innovation Awards 2026 in the Smart Transportation category following a competitive evaluation process conducted by the Consumer Technology Association (CTA), the organiser of CES, the world's leading technology and innovation platform.

The CES Innovation Awards programme received over 3,600 global submissions across 36 technology categories. Jury members are selected based on recognised expertise and leadership within digital technology, connected systems, and innovation-driven product development. Judges include senior professionals from global technology companies such as Google, Apple, Toyota, Cisco, and JPMorgan.

My role involved evaluating advanced digital and connected technologies within the Smart Transportation domain, including mobility platforms, IoT-enabled systems, autonomous solutions, and data-driven vehicle technologies. This appointment represents peer-level recognition of my authority in assessing emerging digital technologies at an international scale.

Selection as a CES Innovation Awards Judge demonstrates sector-level leadership beyond my own ventures, reflecting trust placed in my expertise to help shape global technology standards and innovation direction.

This evidence addresses the Mandatory Criterion by demonstrating:

- International recognition as a leader in digital technology.
- Peer-level authority in evaluating global technology innovation.
- Influence beyond my own organisation through sector-wide technology assessment.
