

UX Design Handoff (Developer-Ready Package)

Clear UX specs, design system, and developer handoff with minimal back-and-forth.

Purpose

Deliver UX/UI outputs that engineering teams can implement quickly, with clear expected behavior and acceptance criteria.

Delivered via Designlogger

All final files, prototypes, updates and approvals are delivered via Designlogger (single source of truth + version control).

A) Product Definition

- Problem statement + success metrics
- Target users / personas (if available)
- Requirements & constraints
- Scope boundaries (in/out)

B) UX Deliverables (Structure & Flow)

- Information architecture / sitemap
- User journeys (key scenarios)
- User flows (happy path + edge cases)
- Wireframes (critical screens)
- Interaction principles + rationale

C) UI System (Design System Delivery)

- Figma UI kit / component library
- Component states: hover / active / disabled / loading / empty
- Validation patterns, error states & rules
- Grid/spacing system + responsiveness rules
- Typography scale + color tokens

D) Screen-Level Specs

- Final UI screens (responsive if needed)
- Breakpoint behavior rules
- Content rules (truncation/overflow/localization)
- Accessibility notes (contrast/focus/keyboard)

E) Developer Handoff Package

- Clickable prototype link(s)
- Asset exports (SVG/PNG) + usage notes
- Token naming logic
- Acceptance criteria per flow
- Known limitations / open items

F) QA Support

- Design QA checklist
- Expected behavior notes for key interactions
- Final approval checkpoints

Let's collaborate!
